

Data Allowance Policy/Bandwidth Usage Policy.

Classic Exede, Essential 10, Exede Evolution and WildBlue Plans are subject to strict data usage limits which are described in the Data Allowance Policy.

If you exceed your data usage limits, ViaSat will significantly slow and/or restrict your Internet Service, or certain uses of your Internet Service, for the remainder of your monthly billing period.

The Liberty service plans (“Liberty Plan(s)”) are subject to “Priority Data” usage limits which are also described in the Data Allowance Policy. If you exceed your Priority Data usage limits, you will receive “Liberty Pass” for the remainder of your monthly billing period. Liberty Pass speeds will be slower than Priority Data speeds, do not support video streaming on multiple devices and may not support streaming of high definition video.

Liberty Pass speeds will vary based on the time of day and your geographic location and may be extremely slow when the network is busy, typically in the evening hours (about 5:00 p.m. – 2:00 a.m. local time), which may greatly impair your ability to use the internet.

Liberty Pass users will receive lower priority on our network than subscribers who have not exceeded their data allowance or other data threshold, which may result in Liberty Pass users experiencing slower speeds when the network is busy than subscribers who have not exceeded their data allowance or other data threshold. Heavier users of Liberty Pass may be slowed to a larger extent than lighter users.

The data usage limits for our Internet Service plans are set forth in Exhibit A, attached hereto and incorporated herein.

Exhibit A
